Skills

- React.js / Next.js / TypeScript
- Tailwind CSS / MUI / Shadcn / Radix UI / DaisyUI
- State Management: Redux / Zustand
- Animations: Framer Motion / GSAP
- API Integration: Axios / React Query / REST API
- Backend: Node.js / Express.js / NestJS
- Database: MongoDB / Mongoose / Prisma ORM
- Other: Responsive Design / Accessibility (a11y) / Component-based Architecture / Git & GitHub / Docker / CI/CD

Work Experience

Banian Omid (Software Development Studio)   Frontend Developer
JAN 2023 - SEP 2025

- Led full-stack development of responsive web applications using React.js, Next.js, and TypeScript, achieving Lighthouse scores above 90% for performance, accessibility, and best practices.
- Translated Figma designs into pixel-perfect, interactive UIs with Tailwind CSS and Framer Motion, enhancing user engagement through smooth animations and intuitive layouts.
- Integrated backend services with Node.js, Express.js, and MongoDB, including real-time features via Socket.IO and secure data handling with JWT/Bcrypt, resulting in scalable and secure applications.
- Optimized codebases for cross-browser compatibility and mobile responsiveness, reducing load times by up to 30% through efficient state management with Zustand and deployment on Vercel.
- Collaborated on component-based architectures, ensuring maintainability and reusability while adhering to a11y standards for inclusive user experiences.

Mixord (Digital Advertising Studio)   Fullstack Developer
JUNE 2022 - DEC 2022

- Single-handedly built the entire platform as a Full-Stack Developer using Next.js 15, TypeScript, Tailwind CSS, Framer Motion, NestJS, MongoDB, Prisma, Cloudinary
- Created smooth scroll animations, dynamic sections, and interactive service showcases resulting in higher client engagement
- Implemented secure contact forms, image optimization, and custom admin panel for content management

NovaStack Studio (Web Development)   Backend Developer
SEP 2020 - FEB 2022

- Developed a scalable backend using Express.js, Node.js, MongoDB, and Prisma
- Created secure and modular APIs for authentication, data management, and real-time interactions
- Integrated Cloudinary for media handling and optimized database queries for performance
